PREFACE

The preparation of this bibliography was undertaken to assist those concerned in obtaining the maximum use from material that has been published on the subject of refuse collection and disposal. While a classified subject listing for a bibliography of this type is a desirable supplement to an alphabetical author listing, it was not feasible at the present time.

Acknowledgement is due S. A. Sanitary Engineer Henry J. L. Rechen who began this bibliography but was unable to continue because of assignment to other duties.

The material contained herein was published during the period 1940 - 1948, and was obtained from the following sources:

1. Agricultural Index
2. Bibliographic Index
3. Cumulative Book Index
4. Engineering Index
5. Industrial Arts Index
6. International Index
7. New York Times Index (selected items)
8. Public Affairs Information Service
